

Bona Hard-Surface Floor Cleaner for Mopping Robots

Boost the cleaning power of your machine

Bona Hard-Surface Floor Cleaner for Mopping Robots is a specially formulated solution designed for use with most mopping robots and mopping vacuums to boost cleaning performance. The unique concentrated formula, with plant-derived ingredients, is infused with lemon & mint essential oils for a fresh scent. Developed for easy and effective cleaning of sealed hard-surface floors including ceramic tiles, laminate, linoleum, vinyl, and sealed natural stone, to leave them clean and beautiful. The rinse-free, streak-free formula cleans hard-surface floors effectively by removing dust, dirt and grime. Love your floors with Bona.

- Suitable for most mopping robots and upright machines (VacMop) to boost cleaning performance.
- pH balanced, suitable for all sealed hard-surface floors.
- Plant based formula with greater than 90% bio-based contents*.
- Fast drying, residue & streak free.
- GREENGUARD Gold certified to ensure low indoor emissions.

TECHNICAL DATA

pH-value:	Concentrate ca. 7 Working solution ca. 7
Dilution:	1 part Cleaner to 20 parts of water (5 %) 5 ml (approx. 1 teaspoon) Cleaner: 100 ml. water
Shelf life:	3 years, from the date of production, in unopened original container.
Storage/Transport:	Keep between +5° C and +25° C during storage and transport.
Disposal:	Handle waste and emptied containers in accordance with local regulations.
Pack size:	2.5 & 1.1 litre containers

*According to ASTM D6866

Bona Hard-Surface Floor Cleaner for Mopping Robots

Boost the cleaning power of your machine

DIRECTIONS FOR USE

Bona Hard-Surface Floor Cleaner for Mopping Robots is a concentrated cleaner and must first be diluted with water prior to adding to your mopping robot's tank.

To dilute the Cleaner, add 5 ml (approx. 1 teaspoon) to 100 ml of water; for a 300 ml tank 15 ml of Cleaner is required. Dilute only the quantity of cleaner that will be used within 4 weeks.

Do not exceed the stated dosage. Using additional Cleaner will not improve the cleaning effect and may result in excessive foaming, which could result in streaking.

Add the diluted Cleaner to your mopping robot's clean water tank and run the normal mopping cycle according to your mopping robot's manufacturer's instructions. If filling the tank directly, fill with water first and then add the Cleaner.

Use only with water at room temperature, if your machine has the facility to warm the cleaning water this must not be used.

If there are adjacent areas of varnished, waxed, or oiled wood floors that you also wish to clean, it is safe to use Bona Hard-Surface Floor Cleaner on those surfaces also.

IMPORTANT

The user is responsible for establishing that the use of this product complies with your mopping robot's manufacturers recommendations. Bona takes no responsibility for failure to follow those recommendations.
