

# BONA RETARDER

**Bona Retarder** is an additive that improves the levelling and maintains the open time of Bona water-based finishes, both primers and top coats. It is designed to be used when low humidity and / or high temperatures are encountered. Using Bona Retarder reduces the risk of the Bona primer / finish drying too quickly or applicator marks being evident in the dried coat.

- Facilitates application in dry and / or warm conditions
- Maintains the open time
- Minimizes the risk of overlapping and discolouration

## Technical data

Addition rate:	Primer / Finish – Maximum 4%
Safety:	Unclassified
Flash point:	Non-flammable
Shelf life:	At least 2 years, from the date of production, in unopened original container
Storage / transport:	The temperature must not fall below +5°C or exceed +25°C during storage and transport
Disposal:	Wastes and emptied containers should be handles in accordance with local regulations
Pack size:	200 ml

## Preparation

Add **Bona Retarder** to the Primer / finish in accordance with the measurements on the bottle and label. Determine the amount of finish required and add the Bona Retarder; maximum 4% of the finish quantity. Shake thoroughly.

Apply the mixed product as normal according to the primer / finish application instructions on the label / technical datasheet.

### Notes

The use of additional Bona Retarder is not recommended as this may affect the drying and levelling of the product.

Bona Retarder should only be used in product which is to be applied within the following 8 hours.

Bona Retarder is designed to be used in conjunction with the normal measures employed to create the best conditions on site for application of Bona finishes. It should not be used in an attempt to reduce such measures being put in place.

## Important notes

The above information is provided in good faith and to the best of our current knowledge but makes no claim to be complete. The User is responsible for establishing that the product and recommendations herein are fit for the designated purpose, floor type and present situation before use. Bona can only guarantee the delivered product. A professional and thereby successful application of the product is beyond our control. If in doubt, make a preliminary test. The User is required to read and understand all information contained on package labels and safety data sheets before using this product.
