

The Non-toxic, Sustainable Choice

All Bona floor finishes are non-toxic water-based coatings. The main difference between toxic solvent based coatings and non-toxic water-based coatings is the amount of Volatile Organic Compounds (VOC's) that evaporate as the finish dries.

Bona's low VOC's means there is no need to vacate premises during application due to solvent fumes and no concern about the health effects of toxic chemicals.

Who is Bona?

- Bona products are available in over 75 countries
- The No.1 choice for professional contractors
- The market leader in non-toxic timber floor finishes globally
- Experts in floor coatings & cleaning products since 1919
