Bona Traffic GO

Next Generation High Traffic Coating

Bona[®]

- ✓ Shake & GO
- ✓ High traffic durability
- ✓ Ready to apply
- ✓ Built-in hardener - activates when applied
- ✓ No waste – unlimited pot life
- ✓ Clear coat – non yellowing
- ✓ Simple & safe
- ✓ Low Emissions & Non-toxic

New level of simplicity for high traffic wear

Bona Traffic GO combines the simplicity of a one-component finish with the durability and superior performance of a two-component product. Traffic GO is designed for high traffic floors in both residential and commercial situations.

No Mixing No Wastage

With Traffic GO there is no need to calculate and mix an external hardener with the finish. So there is unlimited pot-life and zero wastage. You now have a simpler, safer way to achieve high traffic commercial durability.

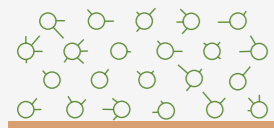

Faster Curing

With rapid cure technology Traffic GO reaches maximum hardness in as little as 3 days. In normal circumstances, floors can be put back into full use just 24 hours after being completed.

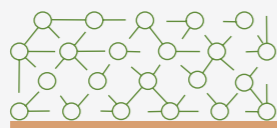

- One-component water-based top coat - with two-component performance
- 100% polyurethane
- Ready to apply - no mixing required
- Built-in hardener - activates when applied
- Excellent wear resistance
- Non-toxic & non-yellowing
- Isocyanate & PFAS free
- No waste - pot life not applicable
- For use with all Bona primers
- Max 3% VOC
- Drying time 2-3 hours between coats
- 3 sheen levels: Satin, Matt, Extra Matt
- Gloss Level (60°):

Satin	45%
Matt	20%
Extra Matt	10%

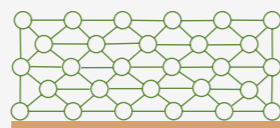

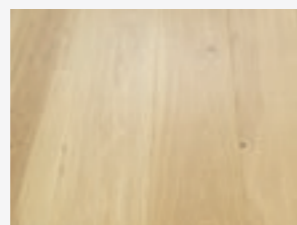

Polymer with built-in hardener

Activates when applied on floor

Hardens into a high performance surface

With Traffic GO the built-in hardener is activated immediately the finish is applied to the floor.

The water in Traffic GO evaporates leaving a web of connected polyurethane (PU) particles that results in a finish with high resistance against stains, scuffs, scratches and wear.

With a PFAS & isocyanate free formula, Traffic GO meets the safety and health regulations of tomorrow.

Isocyanate Free

Bona Traffic GO is free from isocyanates due to its built-in hardener. Isocyanate is used in hardeners as a catalyst which can cause health problems such as allergies and asthma.

PFAS Free

Bona Traffic GO completely eliminates the use of PFAS. PFAS are synthetically produced chemical substances that do not decompose in nature and can potentially result in health problems.

Less than 3% VOC

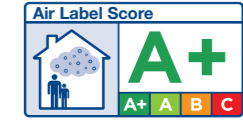

Bona water-based finishes exceed the strictest world standards for VOCs. Exposure to VOCs can be harmful, so it is important to reduce the levels.

Bona's Traffic GO is EMICODE® EC1PLUS classified, the best level achievable for low emissions and exceeding stringent European health and environmental requirements.

Bona's Traffic GO is GREENGUARD GOLD indoor air quality certified, the highest certification available for emissions which means it is safe for use around your home, your family and your pets.

Bona Traffic GO is rated A+. The highest rating attainable which indicates VOC levels and indoor air quality standards are the best possible.

MORE ON
TRAFFIC GO

Bona Traffic GO with a built-in hardener gives you a simpler way to achieve high traffic durability, while keeping health and sustainability a priority.

Safer

With a PFAS and isocyanate free formula, Traffic GO ensures a safer application. Bona's low VOC's means there is no need to vacate premises during application due to solvent fumes and no concern about the health effects of toxic chemicals.

High Traffic Durability

Bona Traffic GO has excellent wear, scuff, and chemical resistance. Suitable for both commercial and residential areas. It is especially suited for areas exposed to high traffic, giving long-lasting protection.

No Mixing

Application could not be easier - Just shake and GO with a built-in hardener that's only activated when the finish is applied.
